

Epic Games

Epic Games is a video game development company that produces games and offers its game engine technology to other developers. The company has been recently valued at more than \$15 billion in its latest funding round, which was led by KKR. The company's most notable game Fortnite currently has over 200 million players which currently generated over \$1.8 billion in sales. On top of its successful gaming platform, the company is expanding its business model through its gaming engine called "Unreal" which help render graphics and control actions in game's environment.
